

End-to-End System Test Report

Test Overview

This document describes the end-to-end system testing performed on two functionalities of the drug management system using Selenium:

1. **Adding a New Drug**
Tests the functionality of adding a new drug to the inventory through the [/new-drug](#) page.
2. **Order Tracking Page**
Tests the functionality of displaying orders on the [/order-tracking](#) page.
3. **Adding a New Order**

Test Cases

Test Case 1: Adding a New Drug

- **Objective:** Verify that a new drug can be successfully added to the inventory using the provided form.
- **Steps:**
 1. Navigate to the [/new-drug](#) page.
 2. Fill in the following details:
 - Name: [Test Drug](#)
 - Company: [Test Company](#)
 - Type: [Prescription](#)
 - Stock: [100](#)
 - Description: [This is a test drug.](#)
 3. Click the "Add Drug" button.
 4. Verify the redirection to the [/inv-monitoring](#) page.
 5. Delete the new drug
- **Expected Outcome:** The system redirects to the [/inv-monitoring](#) page, and the new drug was added to the inventory list, then deleted.
- **Test Script:** [test_add_new_drug\(\)](#)
- **Result:** Passed.

```
Running test for adding a new drug...
DevTools listening on ws://127.0.0.1:52279/devtools/browser/0edda314-9ad2-46d3-a3ba-9b9fc2122ee4
Navigated to the new drug page.
Test Passed: New drug added and redirected successfully.
Test drug successfully deleted in cleanup.
```

Test Case 2: Order Tracking Page

- **Objective:** Verify that the `/order-tracking` page loads successfully and displays the list of orders.
- **Steps:**
 1. Navigate to the `/order-tracking` page.
 2. Wait for the orders table to load.
 3. Verify the presence of the orders table on the page.
- **Expected Outcome:** The system loads the `/order-tracking` page and displays the orders table correctly.
- **Test Script:** `test_order_tracking()`
- **Result:** Passed.

```
Running test for order tracking...
DevTools listening on ws://127.0.0.1:52316/devtools/browser/20a5c440-fe95-49c0-b8cc-b7df6d641adf
Navigated to the order tracking page.
Test Passed: Order tracking page loaded successfully.
```

Test Case 3: Adding a New Order

- **Objective:** Verify that a new drug can be successfully added to the inventory using the provided form.
- **Steps:**
 1. Navigate to the `/new-order` page.
 2. Fill in the following details:
 - Customer Name: `Test Order`
 - Date of Purchase: `2004-01-01`
 - Pick up or Delivery: `Pick up`
 - Order Status: `Awaiting Pickup`
 3. Click the "Add Order" button.
 4. Verify the redirection to the `/order-tracking` page.

5. Delete the new order

- **Expected Outcome:** The system redirects to the [/order-tracking](#) page, and the new order was added to the inventory list, then deleted.
- **Test Script:** [test_add_new_order\(\)](#)
- **Result:** Passed.

```
Running test for adding a new order...
```

```
DevTools listening on ws://127.0.0.1:52342/devtools/browser/3e9ad080-43e5-4ac4-96b6-11babae043fe
```

```
Navigated to the new order page.
```

```
Test Passed: New order added and redirected successfully.
```

```
Test order sucessfully deleted in cleanup.
```
